#### DETAILED ACTION

### Claim Rejections - 35 U.S.C. § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 8-25 are rejected under 35 USC §103(a). This rejection is set forth in the prior Office action paper number 7.

# Response to Arguments

3. Applicant's arguments filed on December 23, 2002 have been fully considered but they are not persuasive.

Applicants argue that the combined references fail to teach or suggest the claimed components since they fail to provide any motivation for combining the references.

Applicants contend that one of ordinary skill in the art would not be motivated to add an anionic dry strength additive to the Finlayson et al. invention, since the cited references and any prior art teach the formation of a complex by the combination of components as claimed.

Application/Control Number: 09/916,355

Art Unit: 1731

This is not convincing because, there is nothing in the claims that teaches the formation of a complex and even if this is claimed, the combination of the references would inherently possess the same properties as claimed, i.e. the formation of a complex would be inherent to the process since the same components are added to the pulp in the same amount.

In response to Applicant's argument that there is no suggestion to combine the references, the Examiner recognizes that references cannot be arbitrarily combined and that there must be some reason why one skilled in the art would be motivated to make the proposed combination of primary and secondary references. In re Nomiya, 184

USPQ 607 (CCPA 1975). However, there is no requirement that a motivation to make the modification be expressly articulated. The test for combining references is what the combination of disclosures taken as a whole would suggest to one of ordinary skill in the art. In re McLaughlin, 170 USPQ 209 (CCPA 1971). References are evaluated by what they suggest to one versed in the art, rather than by their specific disclosures. In re Bozek, 163 USPQ 545 (CCPA) 1969. In this case, the primary reference, Finlayson et al., teaches that the sizing polymer could be combined with other additives, such as strength agents and the secondary references teaches a dry strength agent that can be used along with sizing agents, see previous office action.

Page 3

Application/Control Number: 09/916,355 Page 4

Art Unit: 1731

Applicants also argue that the primary reference, Finlayson et al., teaches away from using an anionic compound, since it would alter the dispersibility of the sizing agent and therefore, it would detract from the amount of sizing dispersed in the water.

This is unconvincing, because, the primary reference, teaches that other additives can be added before the neutralization of the charges by the cationic compound, see, page 14, lines 13-16. This implies to one of ordinary skill in the art that if an additive affecting the charge of the pulp slurry is added then it could be neutralized, if desired, with the addition of the cationic compound. Also one of ordinary skill in the art knows that the papermaking operation is run on a trade off basis in which the addition of a compound could and probably would affect the effectiveness of the other. One of ordinary skill in the art would recognize that if fillers and other components affecting the strength of the paper to be produced are used then a strength agent is used to compensate. The examiner contends that one of ordinary skill in the art would find obvious the use of anionic polymers as taught by Allen et al. in Finlayson et al. invention, since he/she would have reasonable expectation of success if those compounds are used in the process.

#### Conclusion

4. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Application/Control Number: 09/916,355 Page 5

Art Unit: 1731

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to José Fortuna, whose telephone number is (703)305-7498. The examiner can normally be reached on Monday-Friday from 9:30 A.M. to 5:30 P.M.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Steven P. Griffin, can be reached on (703)308-1164. The fax number for this group is (703)305-7115.

Any inquiry of a general nature or relating to the status of this application should be directed to the Group receptionist whose telephone number is (703)308-0661.

When filing a FAX in group 1730, please indicate in the Header (upper right) "Official" for papers that are to be entered into the file, and "Unofficial" for draft documents and other communication with the PTO that are not for entry into the file of the application. This will expedite processing of your papers.
